Leading manufacturer of cables and wires

TFK.Group is one of the global market leaders of wires and cable systems, with numerous trading companies and production plants located in many countries, as well as service units and research and development centers.

In August 2017, the British company JDR Cable Systems – a leading manufacturer of submarine cables and provider of offshore and onshore services for the global wind energy industry joined TFK.Group.

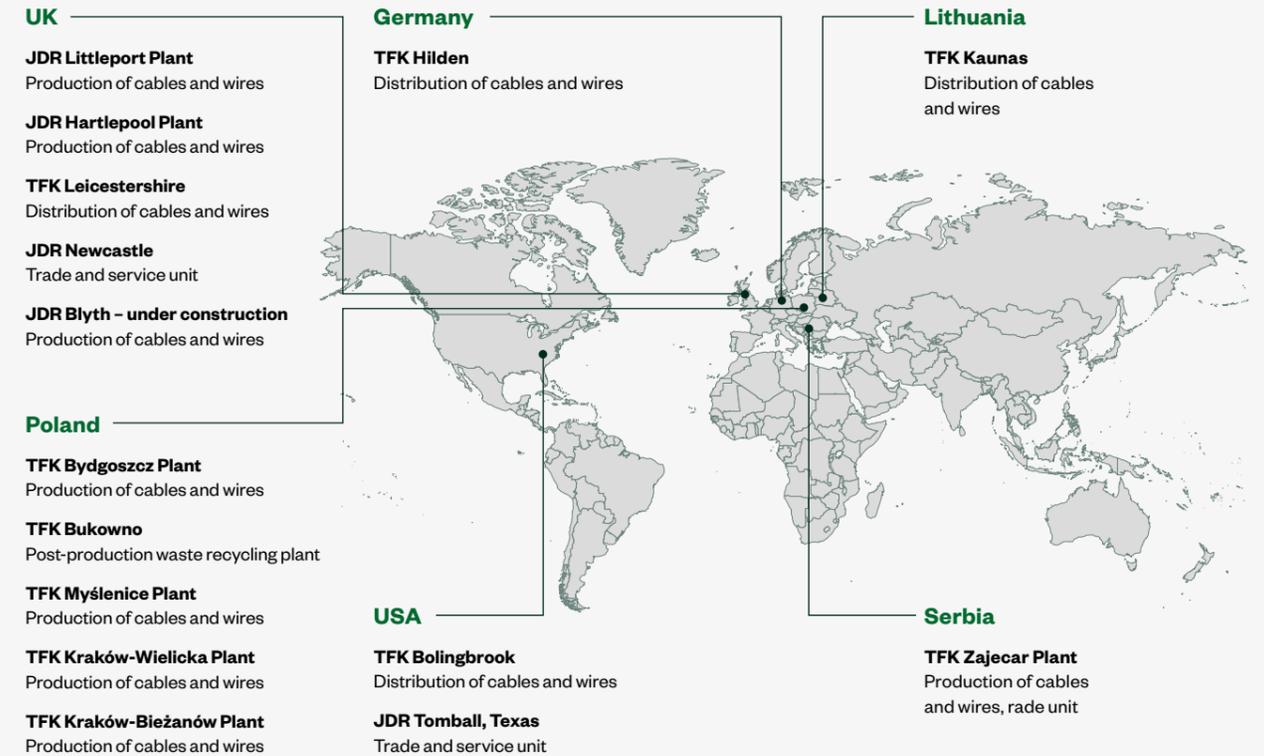

TFK.Group belongs to a small group of a few most specialized and technologically advanced suppliers of high and extra high voltage cable systems. The maintenance and control services provided by TFK.Group is dedicated to oil and gas and renewable energy extraction systems subsea and on land. In addition, the extensive infrastructure of research and development centers allows for qualification tests, routine tests, technological tests and fire tests. Our experience is confirmed not only by continuous supplies to electricity distribution network operators or as part of ongoing investment projects for conventional and wind farms, but also by positive results of production process audits carried out by the most renowned certification bodies.

JDR Cable Systems is a global leader in subsea production umbilicals, subsea power cables and Intervention Workover Control Systems for the offshore oil and gas industry. JDR operates in harsh, dynamic, subsea environments and is a pioneer in the development of cutting-edge inter-array power cables for offshore wind, wave

and tidal energy projects. Additionally, JDR supports customers in the renewable energy sector throughout project planning, mobilisation, installation, commissioning and maintenance, providing total lifecycle support.

TFK.Group produces, among others, cables for the energy sector in the following product groups:

low voltage power cables up to 1 kV, medium voltage power cables from 6/10 kV to 18/30 kV, high voltage power cables from 36 to 150 kV, extra high voltage power cables from 220 to 400 kV, cables; telecommunication copper and fiber optic cables; rubber insulated cables, including mining and crane cables; control cables for data transmission and security, as well as Inter-array cables (33 kV & 66 kV), Subsea Power Umbilicals, Steel Tube Umbilicals, rental and oil & gas services, i.e. submarine cables (including cables connecting wind towers and export cables), which are used in the construction and operation of offshore and onshore wind farms.

Experience and competence of the TELE-FONIKA Kable Group

GLOBAL RELATIONS

Kraków – Wielicka Plant, Poland

One of the biggest cable factories in Poland. It manufactures power cables and wires, including rubber insulated cables and wires applicable in the mining industry and in the offshore and onshore wind farms. As one of the few European manufacturers, the plant is a supplier for mines located in the US, Canada, South America, and Africa. Its offer also includes specialized cables for applications in the railway and shipbuilding industry.

Bydgoszcz Plant, Poland

The oldest cable and wire factory in Poland and the biggest production center of medium, high and extrahigh voltage cables in Europe. Together with the plants in Littleport and Hartlepool, it belongs to the elite group of direct suppliers of complete solutions for the offshore electricity industry.

Myślenice Plant, Poland

Production of fiber optic and telecommunication cables, computer cables and car cables.

Zajecar Plant, Serbia

Production of Al and Cu wires, low and middle voltage cables, signaling and control cables, telecommunication cables, as well as halogen-free cables and wires and car cables.

Waste Recycling Facility in Bukowno, Poland

It has the recycling capacity of approx. 10 thousand tons of cable waste per year. This allows for the recovery of fractions from individual materials with purity of over 99.5%

Littleport Plant, UK

Design and engineering services, IWOC, Subsea Production Umbilicals and Power Cables up to 100 t production. The plant has specialized research facilities.

Hartlepool Plant, Victoria Dock, UK

The biggest JDR production plant with specialized designed teams. Strategically located on the quay, next to the port on the North Sea. A plant with an area of 20,000 m², commissioned in 2009, supplying and producing Subsea Production Umbilicals, Subsea Power Cables and Inter-array Cables. Modern infrastructure of the machine park provides flexibility of the large-size cables production process.

Tomball Service Center, US

Carrying out assembly, integration and testing of umbilicals, reelers and associated packages. The facility provides technical support in projects executed mainly in the Gulf of Mexico, and carries out offshore commissioning, testing and repair works at sea.

Clean Energy

Wind energy is the most advanced and desirable technology among all renewable energy sources. Selecting the right cables that meet strict standards and quality required for trouble-free operation of wind farms is a major challenge.

TELE-FONIA Kable has over 25 years of experience in production of special cables specifically designed for wind energy sector. The current position of our company is a result of continuous research, development and modernization of the machinery, combined with the use of highest quality materials. TELE-FONIKA Kable only works with the best manufacturers of cable accessories, which ensures the highest quality of products supplied by us. Our experience in production and supply of renewable energy cables allows us to create a comprehensive range of products that can satisfy demands of the most demanding clients.

TELE-FONIKA Kable offers cables and wires of high and medium voltage, control cables, fiber optic cables (for data and information transfer), which are used in the construction and operation of offshore and onshore wind farms. Our products used for construction and operation of wind farms have proven long-term durability and guarantee safe and cost-effective operation. Cables were designed to withstand long and harsh working conditions and have proven track record of fatigue, torsion or abrasion capabilities. We work closely with our customers in providing practical efficient solutions.

MEDIUM VOLTAGE XLPE POWER CABLES

Longitudinally Sealed 8.7/15 (17.5) kV

XUHAKXS acc. to HD 620 S3: 2023 Part 10 Section R
 A2XS(F)2Y acc. to IEC 60502-2:2014 and BS 7870-4.10:2011
 NA2XS(F)2Y acc. to DIN VDE 0276-620:2018

Description: ALUMINIUM CONDUCTOR - Circular, stranded and compacted conductor Class 2

Operating Conditions

For laying in ground

Depth of lay:	0,7 m
Ground temperature:	20°C
Soil thermal resistivity:	1,0 K · m/W

For installation in air

Ambient temperature:	25°C
Protection from direct solar radiation	

Parameters

MEDIUM VOLTAGE XLPE POWER CABLES

Longitudinally and Radially Sealed 8.7/15 (17.5) kV

XRUHAKXS acc. to HD 620 S3: 2023 Part 10 Section R
 A2XS(FL)2Y acc. to IEC 60502-2:2014 and BS 7870-4.10:2011
 NA2XS(FL)2Y acc. to DIN VDE 0276-620:2018

Description: ALUMINIUM CONDUCTOR - Circular, stranded and compacted conductor Class 2

Operating Conditions

For laying in ground

Depth of lay:	0,7 m
Ground temperature:	20°C
Soil thermal resistivity:	1,0 K · m/W

For installation in air

Ambient temperature:	25°C
Protection from direct solar radiation	

Parameters

MEDIUM VOLTAGE XLPE POWER CABLES 12/20 (24) kV

YHAKXS acc. to HD 620 S3: 2023 Part 10 Section R
 A2XSY acc. to IEC 60502-2:2014 and BS 7870-4.10:2011
 NA2XSY acc. to DIN VDE 0276-620:2018

Description: ALUMINIUM CONDUCTOR - Circular, stranded and compacted conductor Class 2

Operating Conditions

For laying in ground

Depth of lay:	0,7 m
Ground temperature:	20°C
Soil thermal resistivity:	1,0 K · m/W

For installation in air

Ambient temperature:	25°C
Protection from direct solar radiation	

Parameters

MEDIUM VOLTAGE XLPE POWER CABLES

Longitudinally Sealed 12/20 (24) kV

XUHAKXS acc. to HD 620 S3: 2023 Part 10 Section R
 A2XS(F)2Y acc. to IEC 60502-2:2014 and BS 7870-4.10:2011
 NA2XS(F)2Y acc. to DIN VDE 0276-620:2018

Description: ALUMINIUM CONDUCTOR - Circular, stranded and compacted conductor Class 2

Operating Conditions

For laying in ground

Depth of lay:	0,7 m
Ground temperature:	20°C
Soil thermal resistivity:	1,0 K · m/W

For installation in air

Ambient temperature:	25°C
Protection from direct solar radiation	

Parameters

MEDIUM VOLTAGE XLPE POWER CABLES

Longitudinally and Radially Sealed 12/20 (24) kV

XRUHAKXS acc. to HD 620 S3: 2023 Part 10 Section R
 A2XS(FL)2Y acc. to IEC 60502-2:2014 and BS 7870-4.10:2011
 NA2XS(FL)2Y acc. to DIN VDE 0276-620:2018

Description: ALUMINIUM CONDUCTOR - Circular, stranded and compacted conductor Class 2

Operating Conditions

For laying in ground

Depth of lay:	0,7 m
Ground temperature:	20°C
Soil thermal resistivity:	1,0 K · m/W

For installation in air

Ambient temperature:	25°C
Protection from direct solar radiation	

Parameters

MEDIUM VOLTAGE XLPE POWER CABLES 18/30 (36) kV

YHAKXS acc. to HD 620 S3: 2023 Part 10 Section R
 A2XSY acc. to IEC 60502-2:2014 and BS 7870-4.10:2011
 NA2XSY acc. to DIN VDE 0276-620:2018

Description: ALUMINIUM CONDUCTOR - Circular, stranded and compacted conductor Class 2

Operating Conditions

For laying in ground

Depth of lay:	0,7 m
Ground temperature:	20°C
Soil thermal resistivity:	1,0 K · m/W

For installation in air

Ambient temperature:	25°C
Protection from direct solar radiation	

Parameters

MEDIUM VOLTAGE XLPE POWER CABLES

Longitudinally Sealed 18/30 (36) kV

XUHAKXS acc. to HD 620 S3: 2023 Part 10 Section R
 A2XS(F)2Y acc. to IEC 60502-2:2014 and BS 7870-4.10:2011
 NA2XS(F)2Y acc. to DIN VDE 0276-620:2018

Description: ALUMINIUM CONDUCTOR - Circular, stranded and compacted conductor Class 2

Operating Conditions

For laying in ground

Depth of lay:	0,7 m
Ground temperature:	20°C
Soil thermal resistivity:	1,0 K · m/W

For installation in air

Ambient temperature:	25°C
Protection from direct solar radiation	

Parameters

MEDIUM VOLTAGE XLPE POWER CABLES

Longitudinally and Radially Sealed 18/30 (36) kV

XRUHKXS acc. to HD 620 S3: 2023 Part 10 Section R

2XS(FL)2Y acc. to IEC 60502-2:2014 and BS 7870-4.10:2011

N2XS(FL)2Y acc. to DIN VDE 0276-620:2018

Description: COPPER CONDUCTOR - Circular, stranded and compacted conductor Class 2

Operating Conditions

For laying in ground

Depth of lay:	0,7 m
Ground temperature:	20°C
Soil thermal resistivity:	1,0 K · m/W

For installation in air

Ambient temperature:	25°C
Protection from direct solar radiation	

Parameters

Conductor – nominal cross sectional area	Conductor diameter	Insulation		Metallic screen		Cable diameter D _c	Cable weight	Maximum cable pulling force	Recom. min. bending radius for laying

TYPES OF CABLES

Cable constructions are shown in the following figures:

Figure 1:
XRUHAKXS, XRUHKXS – NA2XS(FL)2Y, N2XS(FL)2Y.

Description of Figure 1

- 1 – Aluminium or copper conductor
- 2 – Semi-conductive screen extruded on the phase conductor
- 3 – XLPE insulation
- 4 – Semi-conductive screen extruded on insulation
- 5 – Wrapping of semi-conductive water swelling tape
- 6 – Metallic screen
- 7 – Wrapping of semi-conductive water swelling tape
- 8 – Longitudinally applied aluminium tape coated with PE copolymer
- 9 – HDPE / MDPE outer sheath

For unusual applications TELE-FONIKA Kable offers you the single-core cables:

Figure 2:
YHAKXS, YHKXS – NA2XSY, N2XSY – XHAKXS,
XHKXS – NA2XS2Y, N2XS2Y, NHAKXS, NHKXS – NA2XSH,
N2XSH.

Description of Figure 2

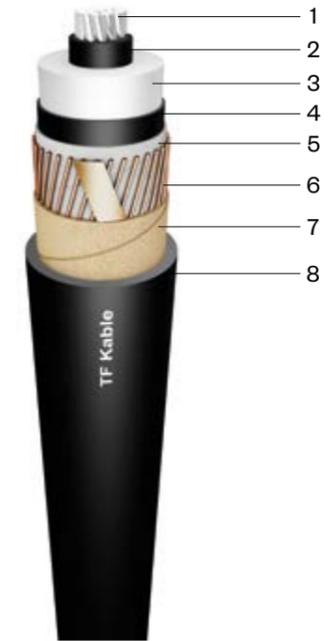

- 1 – Aluminium or copper conductor
- 2 – Semi-conductive screen extruded on the phase conductor
- 3 – XLPE insulation
- 4 – Semi-conductive screen extruded on insulation
- 5 – Wrapping of semi-conductive tape
- 6 – Metallic screen
- 7 – Wrapping of polyester tape
- 8 – Outer sheath: PVC, HDPE / MDPE, LSF

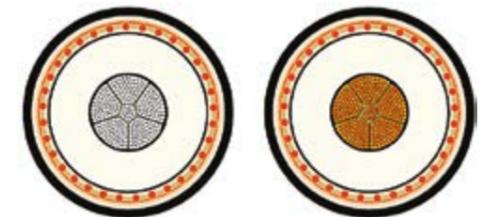

Figure 3:
XUHAKXS, XUHKXS – NA2XS(F)2Y, N2XS(F)2Y,
NUHAKXS, NUHKXS – NA2XS(F)H, N2XS(F)H.

Description of Figure 3

- 1 – Aluminium or copper conductor
- 2 – Semi-conductive screen extruded on the phase conductor
- 3 – XLPE insulation
- 4 – Semi-conductive screen extruded on insulation
- 5 – Wrapping of semi-conductive water swelling tape
- 6 – Metallic screen
- 7 – Wrapping of non-conductive water swelling tape
- 8 – Outer sheath: HDPE / MDPE, LSF

Milliken design conductors are applied for cables conductors with cross-sections > 1000 mm²

Selection of cable

High voltage cables are manufactured based on customer specifications and factory standards.

Cable structures are based on the requirements of IEC standards:

IEC 60287 – Calculation of current-carrying capacity of cables (load factor 100%)

IEC 60853 – Calculation of current-carrying capacity of cables for cyclic load or fault conditions

IEC 60949 – Calculation of maximum short circuit current for cables

IEC 61443 – Maximum short circuit temperature for cables for voltages above 30kV

IEC 60228 – Conductors of wires and cables

When selecting cable, specialized software is used to simulate the cable system operation.

The Minimal diameter of casing pipes: min. 1.5 x D (mm), where D = external diameter of cable in mm.

Calculation basis

In the soil – the temperature of 20°C, cabling depth 1.0 m, soil thermal resistivity K = 1.0 Km/W,

In the distance between phases = 2xD.

In the air – the temperature of 35°C

Installation data

Minimal temperature of the cable during whole laying process: >0°C.

Environmental temperature > -5°C (detailed information can be found in the laying guidelines).

Minimal bending radius and the maximum pulling force for conductor: values are given in the parameter tables.

Pulling forces for outer sheath (cable grip) can be found in the laying guidelines.

The minimal inner diameter of the duct: 1.5 x D, where D = external diameter of the cable.

HIGH-VOLTAGE XLPE POWER CABLES

36/60=69(72.5) kV

XRUHKXS according to IEC 60840

2XS(FL)2Y according to IEC 60840

N2XS(FL)2Y according to DIN VDE 0276-632

H07ZZ-F WIND 450/750 V

Standards: PN-EN 50525-3-21

Description: Flexible cables, cross-linked halogen-free compound insulated and sheathed, with low smoke and corrosive gases emission

Construction

Conductors	Annealed flexible special stranded bare copper conductor class 5 to EN 60228
Separator	A suitable tape separator between the conductor and insulation
Insulation	Cross-linked halogen free thermosetting compound type EI8 in acc. to EN 50363-5
Circuit identification	Colour coding of power conductors comply to HD 308, DIN VDE 0293-308
Colour of insulation	White
Outer jacket	Cross-linked halogen free thermosetting compound type EM8 in acc. to EN 50363-6
Colour of outer jacket	Black or colours can be provided
Flame propagation	IEC 60332-1-2:2004, EN 60332-1-2:2004
Torsion resistance	92 °/m

Characteristic

Low smoke, halogen free, flame retardant jacket

UV, sunlight, ozone and oil resistant

Ink jet printed for easy identification

Application For use in wind turbines. Also, for indoor and temporary outdoors usage, particularly in the case of fire/burning when low emission of smoke and corrosive gases is required

Temperature range Maximum conductor operating temperature: +90°C
Maximum conductor temperature during short circuit: +250°C
Maximum cable surface: +80°C
Minimal installation and handling: -5°C

Standard length cable packing 1000m on drums. Other forms of packing and delivery are available on request

Description:

Portable Power Cables 90 oC UL C(UL)
 Industrial Grade

Construction

Nominal voltage	RHH/RHW-2 600 and 2000V, RW90 CSA 1kV
Conductors	Annealed flexible stranded bare copper ASTM B-3
Separator	White polyester tape applied longitudinally between conductor and insulation
Insulation	Ethylene-propylene rubber (HEPR), UL, CSA, ICEA, 90 oC.; min. 1000psi
Color of insulation	Black
Jacket	Heavy duty CPE thermosetting compound with improved mechanical properties, ICEA S-95-658 NEMA WC-70; min. 1400psi
Color of jacket	Black
Bending radius	Minimal 8xD
Torsion resistant	92°/m

Characteristic

UL listed RHH/RHW-2 600V and 2000V for black jacket

RW90 1kV

90°C (dry), 90°C (wet)

Ozone, sunlight, oil, grease, weather, chemical and abrasion resistant

Rated RW90-TC (Tray Cable) for sizes 1/0 and larger

MSHA, VW-1, SUN RES, FOR CT USE for sizes 1/0AWG and larger and for black jacket

Limited Smoke (LS) ST1 in accordance with (UL) 1685

CSA listed RW90, RW90-TC (for black jacket) 1kV

Application

For wind turbine as power, control Tray cables. Designed for uses requiring a flexible power cables. For portable or fixed installations. Leads for motors generators, batteries, jumper cables. Deep well Submersible Pump Cable. Other industrial applications

Standard length cable packing

1000ft on drums. Other forms of packing and delivery are available on request

NSHXAFÖ 0.6/1 to 3.6/6 kV

Standards: DIN VDE 0250 p. 606

APPROVALS

Description:

Single conductor halogen free flexible power cables

Construction

Conductors	Annealed flexible stranded tin coated or bare copper class 5 to IEC 60228, HD 383
Separator	If needed suitable tape separator between the conductor and insulation.
Insulation	Ethylene-propylene rubber (EPR) type 3GI3 to DIN VDE 0207 p. 20
Outer jacket	Halogen free thermosetting compound type HM3 to DIN VDE 0207 p. 24
Colour of outer jacket	Black or colours can be provided

Characteristic

Excellent flexibility

Water resistant and flame retardant

Temperature range -25°C to +90°C. For fixed installation lowest temperature is -40°C

UV, sunlight, ozone and oil resistant

Ink jet printed for easy identification

Application	Heavy-duty flexible single core power cables for mobile and fixed applications
Standard length cable packing	1000 m on drums. Other forms of packing and delivery are available on request

Parameters

Z-XOTKtsdDb (glass yarn reinforcement)

Analog acc. to VDE: A-DQ(ZN)B2Y
ZN-TF-11:2001; ZN-EK-103

— Outdoor fibre optic cable with multiple optical fibres in a loose tube, duct, reinforced

Description:

Z-XOTKtsdDb – outdoor (Z), with a polyethylene sheath (X), optical fibre cable (OTK), loose tube with dry core sealing (ts), fully dielectric (d), reinforced with glass yarns (Db)

Construction

Central strength member	dielectric FRP rod with or without PE jacket
Optical fibres	singlemode (J) singlemode with non-zero dispersion (Jn) gradient multimode (G/50) gradient multimode (G/62.5)
Tube	loose tube filled with a thixotropic jelly
Filler	polyethylene
Cable core	6, 8 or 12 tubes or tubes and fillers stranded around central strength member
Sealing	dry
Reinforcement	glass yarns
Ripcord	2
Sheath	polyethylene, black

Characteristic

Performance parameters

Fully dielectric (except for cables with al moisture barrier)
Resistant to electromagnetic interferences
Protected from moisture and longitudinal water penetration
Through the use of central dielectric strength member and glass yarns reinforcement
On the core with hot melt adhesive, cables are resistant to longitudinal and transverse stresses
The outer sheath is resistant to abrasion, uv and stress corrosion cracking
The marking and the metric overprint are printed on the outer sheath
The marking can also be tailored to meet customer's requirements
The layer of glass yarns is the basic protection against rodents attack

Application

In telecommunication local, metropolitan and wide area networks in any spatial configuration
For laying in primary and secondary cable ducts.
Can be laid near high voltage cable lines

Temperature ranges

Transport and storage: -40 °C – +70 °C
Installation: -15 °C – +60 °C
Operation: -40 °C – +70 °C

Parameters

Fibre count in cable	Number of elements	Tube diameter	Cable diameter	Cable weight	Max. pulling force		Min. bending radius

Packing length: to be agreed, standard – 4 km
Packing: wooden drums

A-DQ(ZN)B2Y (glass yarn reinforced)

DIN VDE 0888-3

— Outdoor fibre optic cable with multiple optical fibres in a central tube

Description:

A-DQ(ZN)B2Y – outdoor (A), central tube filled with thixotropic gel (D), dry cable sealing (Q), dielectric reinforcement (ZN), layer made of glass yarns (B) with a polyethylene sheath (2Y)

Construction

Optical fibres	singlemode E9/125 (G.652D) or singlemode with non zero dispersion shifted (G.655) gradient multimode 50/125 (G50) or 62.5/125 (G62.5)
Tube	central loose tube filled with a thixotropic jelly
Cable sealing	dry
Reinforcement	glass yarn
Sheath	polyethylene, black

Characteristic

Performance parameters

Fully dielectric
Resistant to electromagnetic interferences
Easy to install
The outer sheath is resistant to abrasion, uv and stress corrosion cracking
The marking and the metric overprint are printed on the outer sheath.
The marking can also be tailored to meet customer's requirements
The layer of glass yarns is the basic protection against rodents attack

Application

For quick connection between optoelectronic devices inside and outside buildings
Suitable for use in cable ducts
For laying in primary and secondary cable ducts

Temperature ranges

Transport and storage: -25 °C – +70 °C
Installation: -5 °C – +50 °C
Operation: -25 °C – +70 °C

Parameters

Z-(XV)OTKtsdD (PE/nylon jacket, aramid reinforcement)

Analog acc. to VDE: A-DQ(ZN)4Y2Y
ZN-EK-103

— Outdoor fibre optic cable with multiple optical fibres in a loose tube, duct, anti-rodent

Description:

Z-(XV)OTKtsdD – outdoor (Z), with a two-layer sheath: polyethylene (outer) -polyamide (inner) (XV), optical fibre cable (OTK), loose tube with dry core sealing (ts), fully dielectric (d), reinforced with aramide yarns (D)

OPTIONS:

Z-(VX)OTKtsdD – with a two-layer sheath: polyamide (outer)-polyethylene (inner) (VX)

Construction

Central strength member	dielectric FRP rod with or without PE jacket
Optical fibres	singlemode (J) singlemode with non-zero dispersion (Jn) gradient multimode (G/50) gradient multimode (G/62.5)
Tube	loose tube filled with a thixotropic jelly
Filler	polyethylene
Cable core	6, 8, 12, 18 or 24 tubes or tubes and fillers stranded around central strength member
Sealing	dry
Reinforcement	Aramid yarns
Ripcord	2
Sheath	black two layers polyethylene (outer)-polyamide (inner) sheath or orange two layers polyamide (outer)-polyethylene (inner) sheath

Characteristic

Performance parameters	Fully dielectric Resistant to electromagnetic interferences Protected from moisture and longitudinal water penetration Use of polyamide sheath protects cables from rodents Polyethylene sheath is resistant to abrasion, uv and stress corrosion cracking The marking and the metric overprint are printed on the outer sheath The marking can also be tailored to meet customer's requirements
Application	In telecommunication local, metropolitan and wide area networks in any spatial configuration For laying in primary and secondary cable ducts For installation on telegraph poles, low and medium voltage power lines or railway traction Can be laid near high voltage cable lines
Temperature ranges	Transport and storage: -40 °C – +70 °C Installation: -15 °C – +60 °C Operation: -40 °C – +70 °C

ZKS-XXOTKtsFf (double PE jacket, corrugated steel tape armour)

Analog acc. to VDE: A-DQ2Y(SR)2Y
ZN-TF-13:2001

— Outdoor fibre optic cable with multiple optical fibres in a loose tube, armoured with corrugated steel tape, for sewage ducts

Description:

ZKS-XXOTKtsFf – outdoor cable for sewage systems (ZKS), with polyethylene outer sheath (X) and polyethylene inner sheath (X), fibre optic cable (OTK), loose tube with dry core sealing (ts), armoured with corrugated steel tape (Ff)

OPTIONS:

ZKS-XXOTKtsDFf – reinforced with aramid yarn (D) (or with glass yarns (Db))

Construction

Central strength member	dielectric FRP rod with or without PE jacket
Optical fibres	singlemode (J) singlemode with non-zero dispersion (Jn) gradient multimode (G/50) gradient multimode (G/62.5)
Tube	loose tube filled with a thixotropic jelly
Filler	polyethylene
Cable core	6, 8, 12, 18 or 24 tubes or tubes and fillers stranded around central strength member
Sealing	dry
Inner sheath	polyethylene
Armouring	corrugated steel tape
Ripcord	2
Outer sheath	polyethylene, black

Characteristic

Performance parameters

Fully dielectric core
Resistant to electromagnetic interferences
Protected from moisture and longitudinal water penetration
Through the use of corrugated steel tapes, armoured cables are resistant to transverse and longitudinal stresses and rodent attack
The outer sheath is resistant to abrasion, uv and stress corrosion cracking
The marking and the metric overprint are printed on the outer sheath.
The marking can also be tailored to meet customer's requirements

Application

In telecommunication local, metropolitan and wide area networks in any spatial configuration
For laying in sewage ducts
For burying directly in the ground in areas with higher risk of mechanical damage
For installation in primary cable ducts

Temperature ranges

Transport and storage: -40 °C – +70 °C
Installation: -15 °C – +60 °C
Operation: -40 °C – +70 °C

Parameters

Fibre count in cable	Number of elements	Tube diameter	Cable diameter	Cable weight	Max. pulling force		Min. bending radius

ZW-(NV)OTKtsdD (HFFR/nylon jacket, aramid reinforcement)

Analog acc. to VDE: A/I-DQ(ZN)4YH U-DQ(ZN)4YH
ZN-TF-13:2001

— Fibre optic cable with multiple optical fibres in a loose tube, reinforced, anti-rodent

Description:

ZW-(NV)OTKtsdD – outdoor/indoor (ZW), with double layer sheath, outer, halogen free flame retardant, inner, polyamide, black (NV) optical fibre cable (OTK), loose tube with dry core sealing (ts), dielectric (d), reinforced with aramid yarn (D)

OPTIONS: ZW-(NV)OTKtsdDb – reinforced with glass yarn (Db)

Construction

Central strength member	dielectric FRP rod with or without PE jacket
Optical fibres	singlemode (J) singlemode with non-zero dispersion (Jn) gradient multimode (G/50) gradient multimode (G/62.5)
Tube	central tube filled with a thixotropic jelly
Filler	polyethylene
Cable core	6, 8, 12, 18 or 24 tubes or tubes and fillers stranded around central strength member
Sealing	dry
Reinforcement	aramid yarns (or glass yarns)
Ripcord	2
Sheath	two-layer sheath: halogen free flame retardant (outer layer) – polyamide (inner layer), black

Reaction to fire

Flame propagation	ICE 60332-1-2
CPR – class reaction to fire (acc EN 50575)	Eca

Characteristic

Performance parameters

Fully dielectric
Resistant to electromagnetic interferences
Protected from moisture and longitudinal water penetration
Can be installed in the proximity to electric installation
Through the use of central dielectric strength member and aramid yarns reinforcement on the core with hot melt adhesive, cables are resistant to longitudinal and transverse stresses
Use of polyamide shell protects cables from rodents
The marking and the metric overprint are printed on the outer sheath
The marking can also be tailored to meet customer's requirements

Application

In telecommunication local, metropolitan and wide area networks in any spatial configuration
For making connection between optoelectronic devices in closed spaces
For laying on the outer walls of buildings
For laying in roads, railway tunnels or mine shafts
For horizontal and vertical suspension

Temperature ranges

Transport and storage: -40 °C – +70 °C
Installation: -15 °C – +60 °C
Operation: -40 °C – +70 °C

Parameters

Description of pictograms used in catalogue

 Construction Products Regulation class	 UV resistant jacket
 The cable meets the requirements of the EU directive	 Humidity resistant
 Cable complies with requirements of RoHS directive	 The cable meets the requirements of the EU directive
 Outdoor cable	 Self-supporting cable
 Universal cable	 For installation in the cable duct
 Halogen-free materials, limited harmful gases emission and smoke density	 Temperature of installation
 Positive result for vertical flame spread test acc. to IEC 60332-1-2	 Exploitation temperature

Clean Energy
Wind Energy Cables
