

REFLECTIVE MINING CABLES

produced by TELE-FONIKA Kable

“Safety reasons inspired us to create a new range of reflective mining cables that meet safety needs deep underground. Our reflective cables are highly visible from the distance, have excellent weatherability and wide applicability.”

- says Piotr Mirek | Vice President,
Board Member - Operations

KEY FACTS:

- Very high flexibility
- Resistance to extremely high mechanical stresses
- Excellent abrasion resistance and tear strength
- Low temperature performance
- High chemical resistance
- Excellent UV, ozone and oil resistance
- Flame retardance acc. To IEC 60332-1-2
- Hydrolysis resistance

Significant factor:

Highly reflective outer sheath, ensuring visibility in harshest environmental conditions.

ADVANTAGES
AGAINST
RUBBER-SHEATHED
CABLES:

5x HIGHER
ABRASION
RESISTANCE

2x HIGHER
TENSILE STRENGTH

2x HIGHER
TEAR RESISTANCE

UP TO 8% LESS
WEIGHT OF THE OUTER SHEATH
